Access Control / Security Engineer – North of UK

Description

The Access Control / Security Installations Engineer position within Tensor involves an initial training period where you will be need to become familiar with the Tensor range of “Smart Card” and biometric Time & Attendance and Access Control products. You will be trained to install these to the NSI NACOSS Gold and ISO 9001:2008 standards. You will be installing and maintaining systems at various locations across northern UK and use our office in St Helens, Merseyside as a resupply base.

Responsibilities

After initial training you will form part of an installation team where you will be expected to carry out

- 1st and 2nd fix installations to a high standard, including commissioning and hand over.
- Planned and reactive maintenance cover for our customer sites.

Qualifications

Applicants must:

- have a solid previous experience in installations of security systems or similar products.
- have a good understanding of current wiring regulations
- be knowledgeable with current PC technology and feel comfortable in using these within a “Windows” environment
- have good personal skills in dealing with people in a customer facing role
- hold a current driving license
- be hard working & self-motivated, willing to travel within the UK and be available to work on a call-out basis when required
- have a clear current criminal record
- have the ability to work to deadlines

We are particularly interested in applicants with the following skills/experience:

- Carpentry skills
- Previous experience in installing to NSI NACOSS gold level (access control/CCTV)
- Qualifications from electrical/electronic industries

Job Benefits

£26,000 – £30,000 per annum (dependant upon experience) with 20 days annual leave + Bank/Public Holidays + Company pension scheme available. Additional annual leave achievable from company sickness scheme. Additional benefits include overtime payments (when available) and on-call payments, mobile phone, use of car, laptop & tools. EMI share option scheme is available after 2 years of employment.

This is an excellent opportunity for an enthusiastic, keen, hard working individual
